

YATA CHARITHA

B. Tech Student, Computer Science (AI & Machine Learning)

Hyderabad, Telangana | +91 9866304471 | charithachandhran@gmail.com | github.com/charithachandhran

PROFESSIONAL SUMMARY

Aspiring Software Engineer with a strong foundation in programming, machine learning, and database systems. Skilled in problem-solving and software development, with a passion for building efficient solutions.

SKILLS

Programming: Python (pandas, NumPy)

ML Basics: Scikit-learn (classification, regression)

GenAI Exposure: Prompting, basic LLM usage

Web Technologies: HTML5, CSS3

Databases & Tools: SQL, Git basics

WORK EXPERIENCE

AI Intern, Summer of AI 2025

Jun 2025 – Aug 2025

Viswam.AI, Telangana (Hybrid)

- Curated and validated 3,000+ Telugu text records according to structured corpus-collection guidelines for an open-source foundational Telugu LLM.
- Built Python scripts to clean, format, and process 3,000+ Telugu text records for team-based model fine-tuning.
- Learnt transformer-based architectures including GPT and BERT, and completed 3 small-scale RAG exercises.
- Collaborated with a multi-intern team using Git and participated in 8+ weekly mentorship sessions to improve data-collection accuracy.

EDUCATION

B. Tech, Computer Science Engineering (AI & Machine Learning)

2023 – 2027

Malla Reddy University, Hyderabad, Telangana — CGPA: 8.75/10

Intermediate (MPC)

2021 – 2023

Pragathi Junior College, Nalgonda, Telangana — 96.8%

Secondary School Certificate (SSC)

2020 – 2021

SPR High School, Nalgonda, Telangana — CGPA: 10.0/10

PROJECTS

Gesture-Based Mouse Control Using AI

Python, OpenCV, Media Pipe, Real-Time Computer Vision

- Built a hands-free mouse-control system using Python, OpenCV, and MediaPipe with support for 5 distinct hand gestures.
- Implemented real-time detection of 21 hand landmarks to control cursor movement, clicking, and scrolling.
- Optimized frame processing to achieve 30 FPS with input latency below 100ms.

Real-Time Eye Detection & Driver Alertness System

Python, OpenCV, Haar Cascade Classifiers, Real-Time Image Processing

- Developed a real-time drowsiness-detection system using Python, OpenCV, and Haar Cascade classifiers.
- Implemented eye-state monitoring and an audible alarm that triggers after prolonged eye closure.
- Applied Eye Aspect Ratio (EAR) to distinguish normal blinking from fatigue-indicating eye closures.

CERTIFICATIONS

AI – Data Scientist, APAC

Machine Learning, Stanford University (Coursera)

Reinforcement Learning, NPTEL

Python 101 for Data Science, IBM
